PROFESSIONAL SUMMARY

Motivated BCA student with knowledge of Machine Learning, Deep Learning, Data Analysis, and Generative AI concepts including LangChain and RAG. Familiar with building basic models and understanding how AI solutions can be applied in practical scenarios. Interested in starting a career in IT roles that combine technical and business understanding.

SKILLS

Technical: Machine Learning, Deep Learning, Data Analysis, Generative AI (LangChain, RAG)

Tools & Technologies: Python, Pandas, NumPy, Scikit-learn, TensorFlow (basic), OpenAI API (basic), LangChain

Other Skills: Communication, Presentation, MS Excel, PowerPoint

PROJECTS

Machine Learning Models (Prediction & Classification)

Built simple machine learning models for prediction and classification tasks using basic algorithms. Worked on data preprocessing and understanding model performance.

Deep Learning Projects

Worked on basic deep learning projects including image classification using CNN, as well as simple ANN and RNN models. Gained understanding of training process and performance evaluation.

LangChain & RAG Projects

Built basic projects using LangChain and RAG such as simple chatbot, PDF-based question answering, and Wikipedia search. Understood how retrieval and LLMs work together in these pipelines.

EDUCATION

Bachelor of Computer Applications (BCA)

Inmantec Institution, Ghaziabad (2023 – 2026)

Class 12th

St. Xavier's Sr. Sec. School, Khera, Pilkhuwa – 85%

Class 10th

St. Xavier's Sr. Sec. School, Khera, Pilkhuwa – 90%
